DISTRICT WEBSITE

The purpose of my website is to **show district information**, such as:
- Leadership composition and branches presidencies
- District activities and events calendar
- District History

Audience:
- District members and leaders who want to see a district's events calendar
- People wanting to know more about our district.

I'm aware that some of the website functionalities may be difficult. I will maintain a simple design in order to present the assignment on time.

If the idea suits with the district's needs and desires and I get their approval, I want to keep improving and adding functionality over time.
